### Bedbug preparation

- Strip all bedding including upholstery blankets and pillow cases
- All bedding must be bagged & laundered on treatment day
- Items stored under the bed must be removed
- Dressers and furniture with drawers must be emptied
- Closets must be fully cleared (shelving & floor areas)
- All clothing must be bagged & laundered on treatment day
- All drapery should be bagged & laundered
- Vacuum carpets, upholstery, mattress, and box spring, concentrating on the perimeter edge of carpets and the edging around the mattress and box spring prior to treatment
- Vacuum bag must be disposed of immediately to a garbage outside of the building
- Move furniture away from walls
- Laundry bags should not be reused for clean laundry
- Cupboards under sinks (kitchen/bathroom) must be cleared
- Baseboards should be removed
- All plug and light switch plates must be removed
- **Some furniture or other items inspected may be required to be disposed of**
- All occupants must remain out of premises for 8 hours
- All pets must be removed and aquariums covered with air intake disconnected
- Infants and pregnant women should be out 24 hours
- People with medical conditions or sensitivities should be out 24 hours

- All food & dishes must be kept in fridge or cupboards

**Preparation is important and necessary for bedbugs to be eliminated**

**If Preparation list is not followed then there will be no Guarantee.**
